ArcticPRO® A/C Service Equipment

NEW!

WB 410 *Mid-Volume Wheel Balancer*

BOSCH Invented for life

The easy-fix parameter data arm automatically measures diameter and distance (2D). Highly recommended for alloy tape weight balancing. The invisible weight mode separates weights for hiding wheel weights behind spokes. The weight optimization mode measures individual rim and tire imbalance allowing the technician to match tire/wheels for reduced weight use. A foot brake locks the balancer shaft in place to ensure accurate weight placement, and the operator recall capability eliminates the need to re-enter setting when multiple operators use balancer.

Rim Width Capacity: 1" - 20"
Rim Diameter Capacity: 10" - 26"
Max. Tire Width: 19.7"
Max. Wheel Weight: 154 lbs.

Combustion Leak Tester

This tester is a fast, economical and highly accurate method to test for combustion gas leaks in Head Gaskets, Cylinder Heads and Engine Blocks. It features a dual-chamber design for higher accuracy to eliminate false readings. The first chamber will filter out any alkaline particles that could result in a false indication of a combustion leak. Test results in the second chamber will provide a true indication of a combustion leak. Gas Engines - Tester fluid changes from blue to yellow. Diesel Engines -Tester fluid changes from blue to green. Positive proof that a leak is present!
